Type cast from Copper Alloy Metal is the lightest and most durable in the world

Our Specimen Book

In response to an urgent demand, quite general with the 6,000 and odd newspaper publishers with whom we are constantly doing business, we have prepared this book of type specimens and printing information for the publisher's desk, for daily use and reference.

The Type and Borders shown in this Specimen Book excel in design, and their durability is assured by the use of the celebrated Copper Alloy Metal, the standard for excellence.

They are the productions of the largest and most complete type foundry in the world, and the newspaper or job office supplied from this Specimen Book is worth far more for use or for sale, than one made up from any ordinary, incomplete type foundry.

With many customers our business relations have extended over a long term of years, with mutual respect and satisfaction, we sincerely believe, and we ask such customers, and all others, to carefully examine the pages of this book, and to make as generous selections as their wants suggest, sending us their orders, and allowing us to apply their purchases upon such advertising account as our business will permit.

Bespeaking a continuance of the cordial and friendly relations of the past, we are sincerely yours for mutual business and success.

USEFUL INFORMATION FOR PRINTERS

HOW TO ESTIMATE.

To ascertain the quantity of body type required for a publication, find the number of square inches and divide the same by four, and the quotient will be the approximate weight of type required; but, as it is impossible to set the cases entirely clear, it is necessary to add 25 per cent. to the weight of large fonts, and 33 1/3 per cent. to small fonts, to allow for dead letter.

HOW TO ORDER SORTS.

In ordering sorts always inclose a metal cap *H* and lower-case *m* of the type you wish to match, and plainly state the quantity of each character required. Be sure and inclose sample before sealing envelope inclosing order. Better put sample in a small envelope. Order every article by the *exact name and number* given in the specimen book. Variations from the book names frequently cause error and delay. *Do not mutilate* a specimen book. It does not help us to receive printed specimens taken from our specimen books. In ordering, write each item on a separate line. Orders written in long paragraphs invite error. Separate the order from the accompanying letter. It will save time.

TYPE STANDARDS.

The following is the standard adopted by the International Typographical Union. The basis of measurement is the lower-case alphabet, from a to z inclusive, and the ems used are the same body as the type measured:

	EMS		EMS
4 1/2 Point	18	8 Point	14
5 "	17	9 "	13
5 1/2 "	16	10 "	13
6 "	15	11 "	13
7 "	14	12 "	13

AMERICAN POINT SYSTEM.

The following table gives the names of the old bodies and their new designation by points:

3 1/2 Point	Brilliant.
4 1/2 "	Diamond.
5 "	Pearl.
5 1/2 "	Agate.
6 "	Nonpareil.
7 "	Minion.
8 "	Brevier.
9 "	Bourgeois.
10 "	Long Primer.
11 "	Small Pica.
12 "	Pica.
14 "	2-line Minion or English.
15 "	3-line Pearl
16 "	2-line Brevier.
18 "	Great Primer.
20 "	2-line Long Primer or Paragon.
22 "	2-line Small Pica.
24 "	2-line Pica.
28 "	2-line English.
30 "	5-line Nonpareil.

72 "	6-line Pica.

RELATIVE PROPORTION OF TYPE BODIES.

Table showing the number of ems of different bodies contained in 1000 ems space of any given body. Also the weight and space occupied by 1000 ems of any body. Also the number of ems of any body, and the number of inches, in one pound.

APPROXIMATE NUMBER OF WORDS IN A SQUARE INCH.

In calculating the number of pages a manuscript will occupy, these figures may be used:

	WORDS TO SQ. IN.		WORDS TO SQ. IN.
18 Point, solid	7	9 Point, leaded	21
14 Point, solid	11	8 Point, solid	32
12 Point, solid	14	8 Point, leaded	23
12 Point, leaded	11	7 Point, solid	38
11 Point, solid	17	7 Point, leaded	27
11 Point, leaded	14	6 Point, solid	47
10 Point, solid	21	6 Point, leaded	34
10 Point, leaded	16	5 Point, solid	69
9 Point, solid	28	5 Point, leaded	50

"Leaded," as here used, means an opening of lines with 2-point leads.

USEFUL IN ORDERING SORTS.

In ordering sorts *always* send a cap H and lower-case m of the font you wish to match. These letters should be sent, no matter what the characters are that you wish to purchase. The following table shows what each box in the type case will hold:

a c d i s m n h o u t r	boxes, each hold	2 pounds.
f b l v g y p w	boxes, each hold	15 ounces.
k j z x q and all figures	boxes, each hold	6 ounces.
e	box holds	3 pounds.
Caps and small caps	boxes, each hold	5 ounces.

TO PRINT CONSECUTIVE NUMBERS.

Orders to print consecutive numbers are received more or less frequently by every printing office, large or small. In the average office, to print the numbers 1 to 200 consecutively would be quite a task, and when undertaken in the ordinary way, with the

facilities usually at hand, the cost is so high that the customer usually concludes to get along with something else than printed numbers, and what might be a profitable job is lost to the office.

Suppose an order for two hundred reserved seat numbers from 1 to 200, six copies of each. It is not necessary to set up more than the units 1 to 0. These figures are to be set up, properly spaced, one above the other, as shown in column A of the table annexed.

A	B	C	D	E	F	G	H	I	K	L
1	11	21	31	41	51	61	71	81	91	01

4	44	54	64	74	84	94	04	14	24	34
5	55	65	75	85	95	05	15	25	35	45
6	66	76	86	96	06	16	26	36	46	56

0	00	10	20	30	40	50	60	70	80	90

One hundred and twenty impressions are taken on strips of cardboard cut to the required width. This done, gives the required number of units. Change the gauge pins in a manner to print the same form beside the printed figures to form the tens, as shown in column B of the table. Take twelve impressions of this form on twelve of the already printed strips. The next step is to change the form by taking the top figure (1) and place it at the bottom of the column, so the next impression on a strip of the first form will read as shown in column C of the table. We print again twelve strips of the first form. This change of the top figures, 2, 3, 4, 5, 6, 7, 8, 9 and 0, respectively, is repeated eight more times, shown in the table as columns D, E, F, G, H, I, K and L. From each change twelve impressions on the printed slips containing the first form must be made. This will finish the tens, and by changing the form to ten figure 1s and again moving the pins to the left for the space-width of the type, and printing six strips of each the former changes from B to L, gives the hundreds, or a continuous run of numbers from 1 to 199 in an edition of six copies. To obtain number 200, print upon the six strips left a figure 2 to head the 00 of column B. In assorting the numbers it will be found that each six copies of the heavy type cannot be used, but this small loss in stock is compensated many times by the advantage derived from the method.

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are founded among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable,

But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Dear Sirs--In answer to your letter of April 3 concerning Trees. Knowing all about such things we have prepared a small booklet entitled Trees--How to Grow Them--which will be sent for the small sum of 14 cents to all farm-houses east of Timbuctoo and north of Easton. The edition contains fine engravings and wood-cuts carved on the wood of trees raised through our efforts, and is printed on hand-made paper.

In the earlier years of his life the parents of Horace E. Walker moved to Claremont, N. H., thence to Brooklyn, N. Y., the father returning to that place from a short stay in California. From thence the family returned to Claremont, at which place the author's poetic labors have since been performed. Come of poor parents his educational advantages were small, he not having attended school since he was about sixteen years of age; and his best work was mostly composed in a cotton factory while tending the Slasher so often referred to in his poems. But not till after he had reached the age of twenty-four did he attempt poetry. And strange enough, the "Lady's Cabinet of Polite Literature" was the star-book of his poetic career, which having been published in 1808, was enchanting to the view.

On August 9, 1852, a child was born at Charlestown, N. H., who, Burns-like, was to eke out a precarious and uncertain poetic existence in the coming years. You see the little gable-roofed house where he was born at the top of the long hill, with its ancient moss-covered watering trough, just on the outskirts of the historic town. It stands there to-day in its unassuming simplicity, with but slight marks of age, though nearly half a century has passed since its birth there.

We now come to the commencement of the third period of Grecian history, at which time the Grecians became intermixed with the Persians in their late history. Darius, son of Hystaspes, being in possession of the Persian throne, resolved to conquer the Greeks, and bring their territory under his immediate control. He therefore sent his army, under the command of his most able officers, into Greece, and the Persians were so sure of success that they carried marble with them for the purpose of erecting a monument to their glory, as conquerors, when the Grecians should be defeated. The celebrated battle of Marathon followed, when the Per-

sian soldiers came in contact with such men as Themistocles, Aristides, Miltiades, and many others of considerable note, distinguished for their courage and valor—who were prepared to resist them, and to defend their country. It is well to notice the character of these prominent men as they come before us in this capacity, and, in doing so, we shall see that they were not unlike men of our own times. The two first mentioned, Themistocles and Aristides, were a perfect contrast in their principles of life.

6 POINT

ARISTIDES WAS A STRONG CONTRAST TO THEMISTOCLES, and appeared everywhere to oppose his corrupt principles. He was a man of true and noble character, straightforward and upright in all his deportment. He would not sacrifice principle to favor his best friend; and because of these excellent traits of character he was called Aristides the Just. Aristides was banished from Greece at one time, through the influence of Themistocles, who wanted to be rid of his constant reproof, and when the people came to vote for his banishment, as was customary, the name of the accused was written upon a shell. A peasant who could not write, and who did not know Aristides personally, approached a stranger and requested that he would write the name of Aristides upon his shell; when the stranger asked: "Why do you vote against him; has he done you any wrong, that you are anxious to condemn him?" "No," replied the peasant, "I do not even know him; but I am tired and angry with hearing him called 'The Just.'" Then that stranger took the shell, and wrote the name Aristides upon it, and quietly and courteously returned it to the peasant. That stranger was Aristides himself.

Themistocles, though having great ability, was always working especially for his individual interest. He loved office, and was ready to do anything that would insure his election to an official position. He had great

wealth and considerable influence, which he used for that purpose. He favored those who would favor him in return; like some men of to-day. About election time there are often those who are ready to grant favors in order to secure the desired object. Their money is made to flow freely, and their affability is most remarkable. This was characteristic of Themistocles. 123456

Many years since men of study, bookkeepers, clerks, and the like, were unable to obtain any relief from the strain upon their eyes caused by the constant use of paper made in an unscientific manner. After many years of experiment and study we have made a paper in which this is eliminated.

One of the most attractive of the new shades has been called Antique Bronze. It is a very fair imitation of some verdigris-covered bronze of ancient statues and coins. Among the new shades of gray are Pearl Gray and the Gray Musketeer, both of which are neutral in tone and in contrast with most every variety of color in writing inks. Mauve and a sap green called Empire seem to be in favor, although neither of these are as attractive as the names might indicate. In our store will be found writing material of every description

In setting this camera for an exposure against fogs, a color screen is used. This is necessary because of the fact that the ordinary fog radiates an excess of blue actinic rays that fog a plate easily. With the seven lenses and the screen, however, the colors of the spectroscope are so blended, neutralized and centered as to make an impression through a dense fog that is more clear cut than a sunlight exposure made through an achromatic lens. From the bow of a boat moving at half speed through fog this apparatus will show every outline of a vessel half a mile away. It is discovered already that this apparatus has a most remarkable influence on non-actinic lights and colors, 15678

THE ancient province of Touraine very nearly corresponds to the modern section of Indre et Loire, but in some directions it is rather more extended. It is crossed from east to west by the rapid and sandy stream of the Loire, from a point not far above Amboise to the valley of Fontevrault. Three rapid tributaries of the Loire at this part of its course join the river from the south. Never a stream in so short portion of its course has so much history to tell. Until the end of the sixteenth century this section of France was covered with numerous châteaux, for beside the old feudal towers, whose

As the artist stands at his case;
His eyes glance quick as his fingers pick

And modern jobs they soon will show,

ADVANCEMENTS

18 POINT

Jenson Italic as a display type is certainly a novelty. It is distinct in style and striking in character and will be a feature in advertising
ATTRACTING BUSINESS

12 POINT

18 A 40 a \$3 25

Makers of Advertisements who formerly recommended the use of old style letters to their clientele will recognize in the Jenson Italic a monotony-breaking substitute, and the reading public will be attracted by advertisements in this striking letter

ORNAMENTAL LOWER-CASE LETTERS *n g y*

The Jenson Italic ornamental lower-case letters are intended to be used exclusively as final letters. To get the best results they should be used sparingly in all classes of work. One or two letters properly placed in a job will add to its attractiveness. The ornamental lower-case letters are made in three characters, n, g, y, and are cast in all the sizes from 12 Point to 72 Point. They are not put up with regular fonts, as all fonts are complete without them. They are furnished at the following prices per font:

12 POINT, 18 POINT AND 24 POINT, EACH 50 CENTS. 30 POINT, 36 POINT, 42 POINT AND 48 POINT,

THE type made by the American Type Founders' Company is conceded by expert printers to outrank all competitors in its beauty of design, style of finish, and admirable wearing qualities. These three cardinal features are, in themselves, sufficient to recommend them to the vast army of purchasing printers and magazine publishers as a money-saving investment

O Leon, my lover,
 Why should you despair,
 When Love comes unbidden
 With wreaths in his hair?
 I love you, my Mona,
 Is easy to say
 As bird on the tree-top
 To sing out his lay.

POINTS TO CONSIDER

8 POINT

20 A 50 a \$2 75

JENSON TYPE.

In Jenson type my printer knows
 The height of typographic pose;
 The black-faced letters cross the page
 Like mummers of some by-gone age
 In solemn, sad, funereal rows.

No matter what is said, "it goes,"
 Though doggerel verse—puerile prose—
 If but its wretched rantings rage
 In Jenson type.

Go, foolish rhyme, and dress your woes
 In this prevailing garb of those
 Who call all well that fits the gauge
 Set by the medieval sage—
 You too, may conquer, I suppose,
 In Jenson type.

6 POINT

EVERYTHING that is required in a printing office, from a pair of tweezers to a perfecting press (to say nothing of type) can be supplied on the shortest notice by any Branch House of the American Type Founders' Company. These Branches are all conveniently located throughout the United States for the benefit of the trade and to facilitate the work of supplying the demands made upon us by an appreciative and increasing patronage. Therefore, place your orders with Branch nearest your place of business to insure promptness. A printing office completely supplied with the products of our manufacture is worth far more for use or sale than one made up from the productions of incomplete type foundries.

NOW to the point that pinches mankind the hardest—the unloosening of the purse-string—and has been the subject of frequent discussions for time immemorial. In figuring on the cost of new type do you regard it as an unnecessary expense or in the light of a good investment to buy the best? If as an investment, suppose a first-class, distinctive style of type costs you a little more than the ordinary and less attractive design, but the returns from the former are double the returns from the latter, which one would you select? You won't hesitate to choose that which is the most profitable.

ARGUMENT AND EXPLANATION

O Mona, you tease me,
 And vex me for aye;
 But, Mona, I love you,
 Shall love you always;
 I would to the altar
 Now lead you a bride,
 But love makes me falter
 And sway with the tide.

Then bye, oh bye, darling,
 For Mona must part
 From Leon her lover
 With dread in his heart;
 Your love is the dewdrop
 That dies in the sun,
 Good-by, and forever,
 With Mona unwon!

ON THE PROGRESS IN MACHINERY AND
THE MAKING OF NEW TYPE FACES. ❁❁❁

IN 1835 I saw for the first time the printing house of Harper & Brothers. With childish awe I watched the flutter of the friskets of a dozen hand presses, and the slow but steady piling-up of printed sheets on the bank. Could any machines be finer or better? So I thought, and so Harper & Brothers thought; but in a few years the hand presses were supplanted by the Adams. This change was but the beginning of a series of changes that I can sketch in outline only. The two-roller Adams of wood frame was followed by the four-roller machine of iron frame and \$4295

MODERN VERSION OF THE WORLD OLD STORY
OF MAKING BRICKS WITHOUT STRAW ❁❁❁❁

WHEN we discover here and there a printer wasting his energies and abilities in the vain endeavor to execute printing to the satisfaction of his clients with type lacking in originality, in art, and devoid of the life that can only be imparted by a genius in designing, we are reminded of the cruel task allotted to the Hebrews by the old Egyptians. There is neither profit nor pleasure in trying to impart an artistic effect with in-artistic type. It is a question whether the durability of such type is not an added injury to the unfortunate printer who uses it. Pound for pound the type of the American Type Founders Co. costs no more than type unenlivened by artistic merit; but in its true value it surpasses all other type as the masterpieces £376

HE HAS DEMANDS FOR FACES BOLD AND BLACK, LIGHT AND SKINNY, BROAD, CONDENSED, LARGE 

MALL, with long ceriphs, with short ceriphs, with high ascenders, with short descenders, and other mannerisms too tedious to describe. We are asked to get these in fonts of thousands of pounds, but to buy half of them, or quarter of them, is to invite bankruptcy. There are publishers who ask that thousands of pages be kept standing for months. There are men before me who have sent, and are sending, proofs to Europe, and even to the Pacific Islands, and Asia. A prominent printer of Paris told me that the weight of the book types in his house largely exceeded two million pounds. The tied-up pages piled up like bricks on every floor of the house was proof of the statement. Fifty years ago a book and job printer could keep sixty compositors at work on a plant of types and appurtenances that cost less than \$10,000.

A GOOD FEATURE IN PREVAILING FASHIONS IS THE GENERAL DISLIKE FOR ALL ORNAMENTAL AND FRAIL TYPES.

WHEN Whittinghouse of London revived the trade for old style letter, in 1844, the old order changed. Not liked at all in the beginning, old style slowly grew in favor, especially with those who wished to give distinction to their work. Before 1860 it was required of every prosperous book and job printer that he should have a full series of old style faces, complete from Pearl to Canon. This compelled a doubling of the expense of equipping the composing room; but if the demand for novelty had stopped here, this added expense might not need any notice. But it did not stop with the modernized old style. Think of the varieties now offered to us by the type founders—Caslon, Franklin, Barth, Binny, Ronaldson, Cadmus or Elzevir, French, Jenson, etc. Nor is this all: other faces with peculiar mannerisms are made abroad, and there are publishers who will have them. Standard or modern-cut Roman is provided by type founders in greater variety. The book printer who has two faces only in series soon finds them insufficient. He has demands for others.

THE MANUFACTURERS OF OUR MACHINES ASSURED US AGAIN AND AGAIN THAT THEIR LAST MACHINES WERE PERFECTION. 

IT was not possible to make anything better; they would meet every demand for strength, speed, accuracy, and ease of handling. So they did for a time; but in a few years on came the improvements, once declared impossible, and in the form of larger and more efficient machines. The presses that were the best of their kind in 1865 proved too small and too slow in 1875. To continue to use them would be to do work at cost or at loss. When one has room enough, the old machines may be set aside and put to an inferior class of presswork. But when rents are high and space is contracted the old machines must be sold. What do we get for old presses? It often happens that after only seven or ten years of service, the press that cost \$3000 or \$5000 will be sold for from \$300 to \$600. It is not worn out, it may be in good condition, and should be efficient for twenty years more, but it must be sold because it is not up to present needs. It will not pay to keep it when your rival is using new machines.

FOR HIS GREAT QUALIFICATION PETER SCHÖEFFER WAS MADE MANAGER OF THE OFFICE IN MENTZ

PETER SCHÖEFFER before the age of twenty years was considered a perfect copyist of old manuscripts, with a slight knowledge of printing taught him by Gutenberg. He attracted the attention of Fust, who found in him one who could cleverly manage a Printing Office, and by adding to his great knowledge the acquirement of ingenuity, he made many acceptable changes in the pages of the Bible and Psalter. Between 1462 and 1464 turbulent times occurred in Mentz, and business was at a standstill.

THE FIRST COPIES OF THE BIBLE DO NOT CONTAIN THE NAME OF THE PRINTER NOR THE YEAR OF PUBLICATION

ONLY a few impressions have been preserved to the present day; indeed, they were entirely lost to the world until the latter half of the eighteenth century, when a copy was found in the library of Cardinal Mazarin in Paris; hence, the few existing copies are generally spoken of as Mazarin Bibles. Some of these were printed on vellum, but the earliest copies were on paper. There are only six copies now extant, two of which are in the United States, one belonging to the collection of Mr. George Brinley, of Connecticut, and the other owned by the late Mr. James Lenox, of New York City. These two copies are on paper. The Brinley copy is said to have a leaf or two in fac-simile, while the Lenox copy is perfect in every respect. This copy now enriches

FEW THOUGHTFUL POINTS ON THE STUDY OF ASTRONOMY

TO many of us it will be very interesting to note the fact that during the month of August there is to be seen Jupiter and Venus in conjunction. It takes place low down in the western part of the horizon, and will be worth all the trouble we can take to witness such beautiful display; also the conjunction of Jupiter and the Moon, and Venus and the Moon. It is an infrequent occurrence to see these three bodies so close together, and the students should therefore avail themselves of this rare opportunity of viewing them.

THE LADY OF SHALOTT

On either side of the river lie
Long fields of barley and of rye,
That clothe the wold and meet the sky ;
And through the field the road runs by
 To many-towered Camelot.
And up and down the people go,
Gazing where the lilies blow
Round an island there below,
 The island of Shalott.

WILLOWS WHITEN AND ASPENS QUIVER
LITTLE BREEZES DUSK AND SHIVER THRO
The wave that runs forever by the island
in the river flowing down to Camelot.
Four gray walls and four towers overlook
a space of flowers and the silent isle em-
bowers the lady of Shalott. By a margin
willow veiled, slide the cumbrous barges
trailed by slow horses, and unhailed the
shallop flitteth silken-sailed, skims \$45

THERE she weaves by night and day
A magic web with colors gay.
She has heard a whisper say
A curse is on her if she stay
To look down to Camelot.
She knows not what the curse may be,
And so she weaveth steadily,
And little other care hath she,
The Lady of Shalott.

And moving through a mirror clear,
That hangs before her all the year,
Shadows of the world appear.
There she sees the highway near,
Winding down to Camelot;
There the river eddy whirls,
And there the surly village churls,
And the red cloaks of market girls,
Pass onward from Shalott.

Sometimes a troop of damsels glad,
An abbot on an ambling pad,
Sometimes a curly shepherd lad,
Or long-haired page in crimson clad,
Goes by to towered Camelot.
And sometimes through the mirror blue
The knights come riding two and two.
She hath no loyal knight and true,
The Lady of Shalott.

EAST BEACH AND THE CONSEQUENCES
WHICH BEFEL THE ROMANTIC MAIDEN

HER eyes spied the photograph of a young man not much older than herself, but with an earnest face; the head was well shaped, the mouth firm and expressive and the eyes deepset and serious looking. Placing the picture on her desk she turned to her book, but there was a fascination about the picture which drew her eyes toward it frequently, when she would be met with those eyes that seemed to look at her reproachfully yet kindly. For the first time she found her book distasteful; it appeared silly, and she threw it down and sat gazing abstractedly at the picture before her. It seemed to her the expression of an earnest spirit and brought home to her careless

THEY are gathering the apples
In the orchard on the hill,
They are carrying the baskets
To the humming cider mill;
The breeze is blowing sweetly
And the autumn days are fair,
The happy farmer whistles
As he works away, out there.

And the smoke is curling upward
As it used to, long ago,
When the winds that made our noses
Rather moist began to blow.
Down the crumpled leaves are falling
From the branches overhead,
And the doves are softly cooling
On the weather-beaten shed;

The ground is strewn with pumpkins
Where the corn is cut away,
And the slopes beyond the valley
Lie in something soft and gray,
While a sort of dreamy music

TO HAVE SOMETHING THEY WANT AND TO LET THEM KNOW

You have it, where they can secure it and what is the basis of exchange. These facts told simply, plainly and honestly by advertisements correctly written and judiciously displayed in the right mediums, will as surely bring you money in exchange for your goods as the day succeeds the night, the relative proportions of your giving and receiving depending naturally upon the value of your goods

All Photo-Engravings are produced by means of photography. It is a fact worthy of note that experimenting in photographic engraving gave rise to photography itself. The aim of Niepce, when he began his researches, was not only to fix the image he obtained by the camera obscura upon a metal plate,

But to convert this plate into an engraving which could be used on a printing press; but his early death prevented perfecting the process to which he had devoted much time and study. From that time experimenting has been continued by several others, and the result is the production of a number of different processes. A popular one is the swelled gelatine process, though handling 2468

This method of engraving has an advantage over wood engraving in the matter of cheapness; but it has countervailing disadvantages, and there are many subjects in which wood engraving surpasses all methods of process engraving. To reproduce a drawing for printing purposes, the picture should be formed of clean, sharp, and very black lines or dots on perfectly white paper. Flat tints and washed or blurred shadows will not answer, unless they are first translated into lines or stipple. Where an engraving is to represent machinery, the 13579

Object is photographed twice the size the plate is to be when finished. The photograph, or silver print, as it is technically called, on which the drawing is to be made, is not toned, but simply fixed in a fresh fixing bath, and then thoroughly washed and dried. It is now ready for the artist, who, with pen and suitable ink, draws directly on the silver print, portraying in delicate lines and dots the lights and shadows of the photograph. After the drawing is complete the photograph is bleached, by pouring upon it an alcoholic solution of bi-chloride of mercury, leaving the ink lines of the artist on clean white paper. The advantage of this method of drawing is at once apparent. The artist has the advantage of working directly on and over

Wenn Franklin heute wieder vor dem Kasten stände, würde er nichts Neues zu lernen haben. Die Schriftgießerei ist hinter der wunderbaren Vervollkommnung der Pressen vollständig zurückgeblieben; die vergrößerte Geschwindigkeit im Schriftsetzen beruht ausschließlich in der Vermehrung der Kästen. Alle Bemühungen, diesem Uebelstande abzuwehren, gingen darauf hinaus, Setzmaschinen zu erfinden, statt die Art und Weise des Handsetzens zu verbessern. Eins der Haupthindernisse, welches den Setzmaschinen im Wege stand, ist die Nothwendigkeit, mit der Hand zu „justiren“. Daran scheiterte hauptsächlich die Einführung dieser Maschinen. Es legt daher auf der Hand, daß jeder

Ungebeten und ungewarnt nimmt sie uns in den Umlauf ihres Tages auf und treibt sich mit uns fort, bis wir ermüdet sind und ihrem Arme entfallen. Sie schafft ewig neue Gestalten; was da ist, war noch nie; was war, kommt nicht wieder—Jedes ist neu und doch immer das Alte. Wir leben mitten in ihr und sind ihre Freunde. Sie spricht unaufhörlich mit uns und verrät uns ihr Geheimnis nicht. Wir wirken beständig auf sie ein und haben doch keine Gewalt über sie. Große und heilige Natur! in deinen Hallen wandelt der Mensch und lernt von Stauden und Bäumen; sein Auge ruht wie ein Fühlhorn am blauen Himmel, und sucht nach dem, nach welchem sich sein Herz in der Brust ausstreckt. Dann wird er selbst zum Priester dieses Tempels eingeweicht; mit Thränen endet er die Feierlichkeit. Durch Menschenliebe predigt er andern Menschen, durch Trost, durch Mitleid und Hilfe.—Wer kann die unendliche Liebe nicht fühlen, die über uns ausgepannt ist, und uns auf dieser Welt mit Zärtlichkeit gefangen

Die hier und da in Gebrauch befindlichen Maschinen sind durchaus unvollkommen; die bei weitem größte Masse der üblichen Schrift ist noch genau der Art wie vor vierhundert Jahren. Wenn Franklin heute wieder vor dem Kasten stände, würde er nichts Neues zu lernen haben. Die Schriftsetzerei ist hinter der wunderbaren Vervollkommnung der Pressen vollständig zurückgeblieben; die vergrößerte Geschwindigkeit im Schriftsetzen beruht ausschließlich in der Vermehrung der Kästen. Alle Bemühungen, diesem Uebelstande abzuhelpfen, gingen darauf hinaus, Setzmaschinen zu erfinden, statt die Art und Weise des Handsetzens zu verbessern. Eins der Haupthindernisse, welches den Setzmaschinen im Wege stand, ist die Nothwendigkeit, mit der Hand zu „justiren“. Daran scheiterte hauptsächlich die Einführung dieser Maschinen. Es liegt daher auf der Hand, daß jeder Plan zur Verbesserung unserer Setz-Methoden in erster Linie die Justirung zu vereinfachen hat, denn da dies der Punkt ist, um den sich die Sache

Every character is cast on en-quad set, and only en-quads and 4-to-em spaces are used for spacing. By setting sticks to a multiple of 10 Point, spacing and justification become mere child's play; in fact, this type is self-spacing. Although the face is large, on examination it will be found that Time-Saving Mail List Type is quite as condensed on the average as ordinary Mail List Type. Price, same as for 10 Point Roman

After a few minutes' work she was restored to consciousness, when she expressed sorrow that her effort had fallen short of her intention, as she was in earnest in her desire to end life. The large curve shows the top—the square corner shows the bottom of the rule—which is square inside up to quad height, giving a firm locking surface without shortening form at corners. Each piece is 6½ picas long and 18 points wide outside, which will be found a convenient size for both Newspaper and Job Work.

EXTRA CORNER PIECES

2 Point per set of four , , 50 cents

4 " " " " , , 50 "

6 " " " " , , 50 "

Offices not having new fonts of rule will find it less expensive to take the fonts above quoted. Not quite so much is charged for the corner pieces when included in the regular fonts as when purchased separately. The standard price is charged for the straight rule, the extra cost being for the corner pieces.
